RE: Traill Fountain, Botanical Gardens, Geelong

Dear Janet,

We are pleased to confirm our quotation to carry out the works for the sum of \$42,500 exc. GST.

We have allowed to carry out the following scope of works

- a. Dismantling of the Fountain as per our attached drawing. We have slightly altered the original proposal to make the dismantling works more practical.
- b. We have allowed to construct a scaffold to access the Fountain, cut and dismantle into sections and lower to ground either using a small crawler crane or other lifting equipment.
- c. Removal of the fountain base and upstand. If constructed in brickwork we will endeavour to salvage the bricks, and store at the Garden's depot. We have allowed to demolish to ground level assuming footings to a maximum depth of 500mm below the existing ground level.
- d. Fabricate a frame around each section of the Fountain for safe transport. At the Council depot we would dismantle the framing for ease of future access by others, whilst ensuring each section is stable.
- e. Load each section onto a truck or trailer to take to Breakwater. Council to provide a forklift for lifting off at the depot.

We have not allowed for

- a. Any permits or authority fees
- b. Any site facilities. Botanical Gardens to provide washup, power and toiler facilities
- c. Any material testing

If you have any questions or wish to discuss our proposal further, please contact me,

Simon Davies
